<p>WhatsApp is a cross-platform messaging and Voice over IP (VoIP) service owned by Meta Platforms. It allows users to send text messages, voice messages, images, videos, documents, and user locations, as well as make voice and video calls over the internet. WhatsApp operates on both mobile devices and desktop computers, providing seamless communication across different devices. Key features include end-to-end encryption for secure communication, group chats, and a variety of multimedia sharing options. The app is widely used globally for personal and business communication due to its ease of use and extensive functionality.</p>

<p>Instagram is a social media platform primarily focused on photo and video sharing. Users can upload media to the platform, apply various filters, and organize their content using hashtags and location tags. The platform also allows users to follow other accounts, like and comment on posts, and share content through direct messages. Instagram features Stories, a function that lets users post photos and videos that disappear after 24 hours, as well as IGTV for longer video content. It was launched in October 2010 and acquired by Facebook (now Meta Platforms) in April 2012. Instagram is widely used for personal expression, brand marketing, and influencer engagement.</p>

<p>Snapchat is a multimedia messaging app where users can send photos, videos, text, and drawings to a controlled list of recipients. These messages, known as "Snaps," can be temporary and set to disappear after they are viewed, adding a sense of privacy and spontaneity to communication. Additionally, Snapchat features Stories, where users can share Snaps with all their friends for 24 hours before they disappear. The app also includes various filters, lenses, and stickers that users can apply to their Snaps to enhance them creatively. Snapchat is known for its focus on ephemeral messaging and real-time communication.</p>
